

Dear future algebra students,

This course can be very challenging at times but with a little dedication, passing it is very achievable. I recommend staying up to date on WebAssign and practicing the material; it is very fast paced. I would often go to the tutoring center and get my Webassign homework out of the way before I left campus in case I needed help (which was often), that way I wasn't pulling my hair out at 11:50 p.m. and having no one to help me. It took me a few times to realize this. Try to keep an open mind and not get overwhelmed every time something new is introduced. Practice for exams at least a few days in advance. In this class, cramming made my anxiety worse. DON'T PROCRASTINATE! (I know it's hard) If there is one thing I could have done differently that would be it. I feel like even when I did grasp the material, failing to practice enough ahead of time reflected on my grades. Don't be afraid to ask questions. Professor Yosko is a really excellent teacher and it really can be a fun class.

Good Luck!

RK
